

Bhagyashri Varma

Founder

“**Noesis** provides both design-driven solutions & technical expertise, catering to a diverse clientele, including Architects, Builders, Developers and Government Agencies.”

Established in 2011 by Bhagyashri Varma (B.Arch, PGPCM, IIM-C), Noesis MEP is a leading engineering firm delivering integrated mechanical, electrical, and plumbing solutions across India. With over 2 crore square feet of executed construction projects ranging from 5,000 sq.ft offices to 3,20,000 sq.ft townships, our team of skilled engineers specializes in designing, installing, and maintaining MEP systems that create comfortable, healthy, and productive spaces. We combine cutting-edge technology with sustainable practices to provide cost-effective, code-compliant solutions for diverse clients including architects, builders, developers, and government agencies, with particular expertise in residential towers compliant with MoEF/HRC guidelines and innovative hospitality sector projects.

Engineering the future of buildings

Innovative, sustainable, and efficient solutions for mechanical, electrical, and plumbing engineering.

We design and deliver MEP systems that create comfortable, healthy, and productive spaces for people to live, work, and play.

SERVICES OFFERED

ELECTRICAL

- Lighting systems and controls.
- Low voltage equipment and distribution.
- Lifts and escalators specialist services.
- Structured Data Wiring Systems.
- Standby generator control
- CCTV/ security/ Access control.
- Computer uninterrupted power supplies (UPS).
- Power distribution.
- Floodlight and decorative lighting.
- Emergency lighting &. fire alarms.
- Call systems

Mechanical/HV AC

- Central Air conditioning.
- Natural Ventilation System.
- Mechanical Ventilation System.
- Gas Based Evaporation Cooling.
- Thermal Storage System.

Plumbing & FireFighting

- Water Supply and Distribution system.
- Piping and fixtures layout.
- Sewage Treatment Plant.
- Hydrant layout.
- sprinkler layout.
- Storm water collection and drainage system.
- FF pump room layout.
- Fire Alarm System Design.

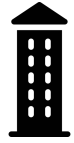

Renewable Energy

- Solar Hot water system.
- Solar Electric Generation.
- Wormiculture.
- Waste Management System.
- Rainwater Harvesting system.

DELIVERABLES

- Complete design of internal/external installation. Preparation of detailed budgets.
- Design of size of cables, transformers LV/ H.v./ Panels etc.
- Co-ordination with Architects / Plumbing / Landscaping Consultants vis-a-vis your office.
- Preparation of tenders/Call of Quotations, finalization of contracts and negotiations with the contractors/ suppliers, to control investment in electrical works as per Budget/ Requirements.
- Generator Selection, Testing, Preparation of various schemes for Auto Change Over Systems, Atomization.
- Design of Building Management and Automation System, Wi-Fi Connectivity on Internet.
- Consulting in improvement of power factor of bulk consumer and reduction in Harmonics.
- Regular Site inspections, quality check, control of material consumption,
- Assisting in purchasing better quality material of economical rates.
- Site selection for economic design for layout of transformers, meter boxes, etc.
- Issue of Blue Prints for Contractors, Architects/Electrical Inspector, Site Engineers, Electricity Board and finally to Users/Property Managers.
- Assisting Electrical contractors in technical discussion with local electricity boards and finally to users/Property Managers.
- We ensure proper electrical planning, designing, and electrical drawings.
- Energy Saving Measures and Calculation.

OUR CLIENTS

High Rise Towers

Hotels

Data Center

Residential Townships

Commercial Buildings

High end Interior

OUR NOTABLE PROJECTS

Noesis has successfully delivered a wide range of projects, including high-rise towers, hotels, data centers, residential townships, commercial buildings, and high-end interiors. Each project reflects our commitment to quality, efficiency, and sustainability.

In India, our high-rise towers and residential townships have become architectural landmarks, blending urban design with thoughtful green spaces to enhance the quality of living. Our hotels and commercial buildings showcase Noesis's expertise in creating functional spaces with a touch of luxury, tailored for comfort, efficiency, and aesthetic appeal. Through data center projects, we support India's expanding digital infrastructure, focusing on security, scalability, and energy efficiency. Across all our endeavors in India, Noesis maintains a commitment to sustainable development, incorporating green building practices to support India's environmental goals and local communities. Below is a showcase of few of our completed projects in these categories.
